SKILLS SUMMARY

- **Languages:** Dart, JavaScript, Rust, Python, C
- **Frameworks:** Flutter, React Native, React
- **State Management:** BLoC, GetX, Riverpod, Provider, EventBus
- **Tools:** Git, Github, Firebase, REST API, Netlify.
- **Platforms:** Visual Studio Code, Android Studio, Linux
- **Packages:** Freezed, Dio, HTTP, Hive, Shared Preferences

WORK EXPERIENCE

Junior Flutter Developer | Tawseil BD

September 2025 – Present

Food Delivery System (4 Apps)

- Worked on a multi-application food delivery ecosystem including **POS App, Manager App, Customer App, and Driver App**.
- Maintained and extended source code originally developed from a CodeCanyon template.
- Debugged complex production-level issues and improved app stability and performance.
- Implemented new features based on business requirements and client needs.
- Developed a complete **offline-enabled POS ordering system**.
- Designed and implemented offline order storage mechanism using local persistence.
- Built automatic order synchronization system that sends stored orders to backend when internet connection is restored.
- Implemented real-time order status management from order list (**New → Accepted → Cooking → Delivered**).
- Used **Riverpod** for scalable and maintainable state management.
- Integrated **REST APIs** and handled error states, loading states, and edge cases.
- Managed app releases and successfully published apps on:
 - **Google Play Store**
 - **Apple App Store**
- Worked with production environment configurations and release builds for both **Android** and **iOS**.

Technical Highlights

- **State Management:** Riverpod
- Offline-first Architecture
- API Integration & Error Handling
- Local Data Persistence
- Play Store & App Store Deployment
- Production Debugging & Maintenance

Junior Flutter Developer | Raintor | Link

February 2025 – September 2025

- Updated UI components across 4 company apps to match the latest design trends
- Fixed critical bugs to improve performance and user experience
- Implemented new features using Flutter and BLoC architecture
- Designed and integrated custom animations to enhance UI/UX
- Integrated API with BLoC for efficient state management

PROJECTS

» Kids ABC Learning | Link

- **Platform:** Google Play Store

Features:

- **Letters:** Kids can learn English small letters and capital letters with it.
- **Digits:** Kids will be able to be familiar with numbers.

- Words: There are some words those are started with English letters.
- Find: This section is for finding announced things.
- What: This section is for finding the name of other presented items.
- Gap: This is for finding the specific letter that fills the gap.

» **Forex Genius Calculator | Link**

- **Platform: Google Play Store**

Features:

- Calculate Lot Sizing for Forex Trading
- Use offline after connecting once a day.

» **Analog Clock | Link**

- **Platform: Github**
- Analog Clock view animation in the home screen
- Stopwatch, Timer

» **Notes Keeper | Link**

- **Platform: Xiaomi GetApps**
- Notes can be shared through social media as a PDF file.

» **QR-Code Scanner and Generator | Link**

- **Platform: Github**
- Flutter is used for building this app.

App Publishing Platforms Experience

- **App Store (Apple Store)**
- **Google Play Store**
- **Huawei AppGallery**
- **Xiaomi GetApps**
- **Palm Store**
- **GetJar**

EDUCATION

K.M. Humaiyun Kabir Engineering College

Bachelor of Science - Computer Science and Engineering

Mymensingh, Bangladesh

September 2022 -

Mymensingh Govt. College

Higher School Certificate

Mymensingh, Bangladesh

June 2019 – July 2021

SOFT SKILLS

Communication, Problem-Solving, Time Management, Adaptability, Attention to Detail, Teamwork, Leadership, Self-Motivation
